

Compu-Mail 660M February 2010

Compu-Mail of Niagara Falls New York has recently purchased and installed the new Graphic Whizard VividCoater XDC-660M from Comgraph Sales and Service Inc. Mark Krull, production manager at Compu-Mail states “UV Coating enhances our work by bringing out the color and adding density. We were sending UV coating out to get done, now we can provide it in house as well as now offer it to new clients. The XDC series provided excellent value that met the on demand short run market we are in”. Seen left to right, Brian Schiemant, Presedent Comgraph Sales & Service, Cassandra Zimmerman, Bindery Operator Compu-Mail and Mark Krull, Production Manager Compu-Mail.
