

Formula for Success

Minuteman Press

Tom Conner purchased a troubled Minuteman Press in Wall, NJ in 2018.

“I could see it was doing well below its potential with little marketing being done and old equipment. One of the first pieces I purchased was a conventional cutter, then wide format and sublimation equipment. Having increased the business to nearly 150% in the first few months, even with the new cutter, I had a bottleneck in the cutting department.” Recounts Tom Conner, Owner of Minuteman Press in Wall.

“When I saw the Graphic Whizard PT 335SCC at the Minuteman Show I knew it was what I needed to open up production. October was our busiest month ever and we wouldn’t have gotten through it without the SCC.”

“We named it Steve because it’s like having another employee. We just drop the work on Steve, push a button and walk away. Cutting, creasing and perforating, Steve gets it done.”

Tom Conner, Owner of Minuteman Press in Wall, New Jersey with his newest “employee”, Steve.

The **PT 335SCC MULTI** is a completely automatic, full-bleed finishing system for the digital marketplace. Equipped with auto sheet measure and an on board job creator set up is fast and simple.

Interchangeable creasing/ perfining dies and strike perf capability allows the PT 335A to do partial perfs in both directions for one pass for “L”, “T” and Box perfining or crease and slit table tents in one pass. The PT 335SCC makes short work of business reply perf-outs, coupon perfs, greeting cards, invitations, table tent cards and more.

It is the ideal finishing solution to
